

ZINCO PROJECTS

WORLDWIDE

ZINCO GREEN ROOFING IS SYNONYMOUS WITH DEVELOPED EXPERTISE

From the ski slope in Copenhagen to a roof garden with olive trees in Spain, from off-road vehicle test tracks in Singapore to the 2.4 km long High Line Park in New York, this brochure has 35 exemplary projects that were carried out around the world with Zinco system build-ups.

As unique as the wishes of the clients are and as varied as the approaches taken by the planners and architects are, all if these projects have one thing in common: the use of a roofscape to create additional living space. For us, this is the best possible endorsement of the Zinco slogan: Life on Roofs.

These landscapes are, of course, only possible thanks to the technical installations “beneath the surface”, which ensure permanent and proper functioning. But, these installations are not the point of focus in this brochure.

You should, rather, be inspired by the ideas conceived by planners around the globe and executed by expert contractors, freeing up space once again for nature in our towns and cities.

As you will see, it is not always the building size that is impressive but indeed the expert interaction between the different components used, which allows us to forget that we are actually on a rooftop. We hope that you enjoy reading our brochure and that it will inspire you for your own future projects.

Danke / Thank you

Auch auf diesem Weg möchten wir uns ganz herzlich bei allen Bauherren, Planern, Architekten, Landschaftsarchitekten, Partnerunternehmen und Ausführungsbetrieben bedanken, die diese Projekte und damit letztlich auch diese Broschüre erst möglich gemacht haben.

Nicht zuletzt durch ihre Ideen, An- und manchmal auch Herausforderungen für die gezeigten Objekte haben sich unsere Systeme zu dem entwickelt, was sie heute sind.

Und schließlich danken wir allen, die uns das in der Broschüre verwendete Bildmaterial zur Verfügung gestellt haben.

We would also like to take this opportunity to thank all our clients, planners, architects, landscape architects, partner companies and contractors who have made these projects, and consequently, this brochure possible.

It is not least because of your ideas, specifications and at times challenges relating to the buildings shown here that our systems have developed into what they are today.

Finally, we would like to thank everyone who has provided photo material for this brochure.
